

## Podcast Creation Guide for Google LLM

=====

### I. Credible Cybersecurity Sources

-----

#### 1. NIST Cybersecurity Basics:

<https://www.nist.gov/cyberframework/online-learning/cybersecurity-basics>

#### 2. Cybersecurity & Infrastructure Security Agency (CISA):

<https://www.cisa.gov/cybersecurity>

#### 3. Federal Trade Commission – Online Safety Tips:

<https://consumer.ftc.gov/online-safety>

#### 4. National Cybersecurity Alliance – StaySafeOnline:

<https://staysafeonline.org/resources>

Use these sources for accurate information about phishing, passwords, safe browsing, and beginner-friendly cybersecurity habits.

The podcast should reference these concepts but remain conversational, youthful, and not overly technical.

### II. Full Prompt to Give Google LLM

-----

Copy and paste the following prompt directly into Google Gemini or any Google LLM:

“Create a complete 600–850 word podcast script for a cybersecurity awareness episode titled ‘Facing Cyber Threats Together.’ The audience is college students and young adults who feel intimidated by cybersecurity. The tone must be warm, friendly, conversational, slightly humorous, and very accessible. The script must follow this exact structure:

#### 1. INTRO (45–60 seconds):

- Host greeting
- A short, funny or relatable cybersecurity scare story
- Why cybersecurity matters to students
- Preview of episode

#### 2. SECTION 1 – Why Cybersecurity Feels Scary:

- Hollywood vs reality
- Student-life metaphors (dorm WiFi, Canvas emails, roommate issues)

#### 3. SECTION 2 – Story Segment (Emotional Hook):

- A realistic student getting phished or hacked

- Emotions, what the scam looked like, how they realized it was fake
- Lessons learned

#### 4. SECTION 3 – Practical Takeaways:

Use simple explanations for:

- Strong passwords
- Two-factor authentication
- Avoiding suspicious links
- Public WiFi risks
- Device updates

#### 5. SECTION 4 – Empowerment Message:

- Cybersecurity is not about perfection
- Encouragement and community-oriented tone

#### 6. OUTRO:

- Thank listeners
- Tease next episode
- Motivational closing line

#### STYLE REQUIREMENTS:

- Must sound spoken, not written
- Use audio cues like (pause), (laughs), (music fades in)
- No advanced hacking content
- No jargon without explanation
- Must be based on general safety principles from NIST, CISA, FTC, and StaySafeOnline.

#### OUTPUT:

Provide a clean, ready-to-use podcast script following all rules above.”
